

SIDDIK VADLA

Software/Frontend/AWS DevOps Engineer

+918500783032 — Portfolio — vadlasiddik@gmail.com — LinkedIn — Leetcode — github.com/vadlasiddik01

Education

RGUKT IIIT Srikakulam

BTech, Computer Science and Engineering, **GPA: 8.5**

Pre University - RGUKT IIIT Srikakulam - **GPA: 9.07**

NXTWAVE CCBP 4.0 Industry Ready Certification Academy Program

Srikakulam, Andhra Pradesh

Apr 2022 – Apr 2026

Jan 2020 – Apr 2022

Experience

SDE Intern - TooClarity - Startup Product Based Company - ([LINK](#))

Sep 2025 - Nov 2025

- Production Application **Architecture** and **Scalable Dashboard Analytics** Design.
- **Client-Side Caching:** Improved performance by storing and reusing frequently accessed data.
- **API Optimization:** Reduced multiple API calls to a single request using efficient caching, **Cursor Based Pagination**.
- **WebSocket Integration:** Connected frontend with backend socket server for real-time communication.
- **Performance Optimization:** Implemented Lazy Loading, Code Splitting, and Image Optimization
- **State Management:** Managed application state efficiently using Context API & Redux.
- **Reusable & Variants Based Component Architecture:** Built reusable, accessible UI components using Tailwind CSS, shadcn/ui, CVA, and clsx to ensure consistent styling and maintainability.
- **Version Control:** Collaborated using Git, GitHub, Branching, Cherry-Pick, Pull Requests, Merge Conflicts & Revert.

Full Stack Developer Internship - Yashik Yadav and Co Company - ([LINK](#))

May 2025 - July 2025

- *Designed and Impressed HR with my Optimized, Refactored modern frontend webpages for websites and got Performance BONUS for my frontend work and also worked on backend.*

Software Support Volunteer - Ubuntu, Windows OS

Jan 2023 - Apr 2026

- In our University, in more than 200+ laptops installed Dual boots and solved issues through CLI.

Technical Skills

Frontend: React, Next.js, TailwindCSS, Framer-Motion, TanStack Query, Redux, shadcn/ui, Radix UI, Axios

DevOps: Docker, Kubernetes, Terraform, Helm, ArgoCD, GitHub Actions, Jenkins, Ansible, Prometheus, Grafana, Linux, Troubleshooting, Shell/Bash Scripting, DevSecOps

Languages & Tools: Java, JavaScript, TypeScript, SQL, Git, GitHub, Python

Cloud: 25+ Amazon Web Services, VPC, IRSA, NAT, EC2

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, SQLite, MySQL, DynamoDB

Projects

End-to-End Ecommerce User-Admin Project | Cloudinary, Multer, CORS, Razorpay, Stripe, Axios, JWT, Bcrypt, ReactToast, Tailwindcss, ViteJS, MongoDB, ExpressJS, NodeJS, ReactJS - ([LINK](#))

- Industry level Project, Cloudinary Image Uploading, User-Admin Panels, Realtime Cart, Order tracking.

Player Performance Profile Dashboard | Framer-motion, Lottie, ThreeJS, ThreeFiber, Recharts, React-Confetti, HeroIcons, GeminiAI, TypeScript - ([LINK](#))

- Developed a responsive, gamified sports analytics platform that visualizes player performance (training vs. match) on an interactive human model with AI-powered insights.

Terraform & Amazon EKS Production Infrastructure Automation | Terraform, Amazon EKS, Kubernetes, Karpenter, Helm Charts, AWS Load Balancer Controller (ALB), IAM, IRSA, EC2, VPC, S3, DynamoDB, NGINX, Shell Scripting, Git, AWS CLI, kubectl - ([LINK](#))

- Built a production-style Infrastructure as Code (IaC) platform to provision AWS Services, **Karpenter autoscaling, IRSA, Helm deployments, ALB Ingress**, and Implemented **Remote Backend state (S3 + DynamoDB)**, reusable Terraform modules, workspaces, optimized EKS AMIs, LoadBalancer/ALB exposure, security best practices (PoLP, IRSA) and reduced EKS provisioning time from 15 minutes to 1 minute.

AWS 25+ Services Hands On Zero to Hero Abhishek Veeramalla Project | Route53, Elastic Beanstalk, Lambda, EventBridge, CloudTrail, Systems Manager, RDS, ELB. - ([LINK](#))

- Gained Experience on **25+ DevOps-focused AWS Services**, covering core infrastructure services (EC2, VPC, S3), automation via CloudFormation, CI/CD pipelines (CodeCommit, CodePipeline, CodeBuild, CodeDeploy), monitoring with CloudWatch, and container orchestration using Amazon EKS, including Realtime Scenario Issues.

End-to-End GitOps CI/CD Platform with ArgoCD for Go Application | Golang, Docker, Multi-Stage Builds, Eksctl, NGINX Ingress Controller, Helm Charts, GitHub Actions, Argo CD, GitOps, Linux.

- Engineered an end-to-end GitOpsified platform for a Go-web-app using **multi-stage Docker builds for optimized, secure container images**, AWS EKS, **GitHub Actions** and ArgoCD.

Most Proud Of

Awards and Achievements: Got an appreciation **REWARD** from Kurnool **COLLECTOR** Sir, for **Speaking Creatively** in SPANDANA Programme. **Certifications:** Industry Ready Certifications from Nxtwave CCBP.
